

HAZIR ANTİFRİZ (READY ANTIFREEZE) -40 °C

Ready to Use Engine Coolant

Description

This is an ethylene glycol based product containing rust, corrosion, abrasion and antifoam additives for use in engine radiators. It does not contain nitrite, amine, phosphate, borate and silicate in accordance with environmental health regulations.

Applications

It is used in summer and winter as it prevents freezing of the radiator water in cold weather and boiling in hot weather in aluminum and other types of radiators. It is ready to use, there is no need to add water.

Benefits

- It decreases the freezing point of cooling water.
- It prevents the boiling of the radiator water in summer by raising the boiling point of the water.
- It prevents rust and corrosion in the cooling system.

Performance

SAE J 1034, ASTM D-3306, ASTM D-4985, BS 6580, TS 3582

Typical Specifications*

Color		Light Green
Density, @ 15 °C kg/m ³	ASTM D-1122	1.07
Ph, %33	ASTM D-1287	9.15
Reserved Alkanitiy (Ph 5.5)	ASTM D-1121	9.9
Freezing Point, °C	ASTM D-1177	-40
Slip Point, °C	ASTM D-1120	109
